

Production of the Cat (An-10, An-10A) Turboprop Transport at Voronezh

Airframe Plant No. 64 Confirmed: Two recent observations have [REDACTED] 25X1B4d  
25X1B4d

[REDACTED] production of the Cat at Voronezh Airframe Plant No. 64.

On 4 December 1958 a total of 12 Cat aircraft were sighted on the factory  
airfield. At least one of the transports had a red star on the tail, and

the remainder had Aero-Flot markings. On 9 December 1958 a Cat [REDACTED] 25X1B4d  
25X1B4d [REDACTED] was observed at Rostov.

A cat [REDACTED] at Kiev

on 8 November 1958. [REDACTED] 25X1B4d

25X1B4d [REDACTED]

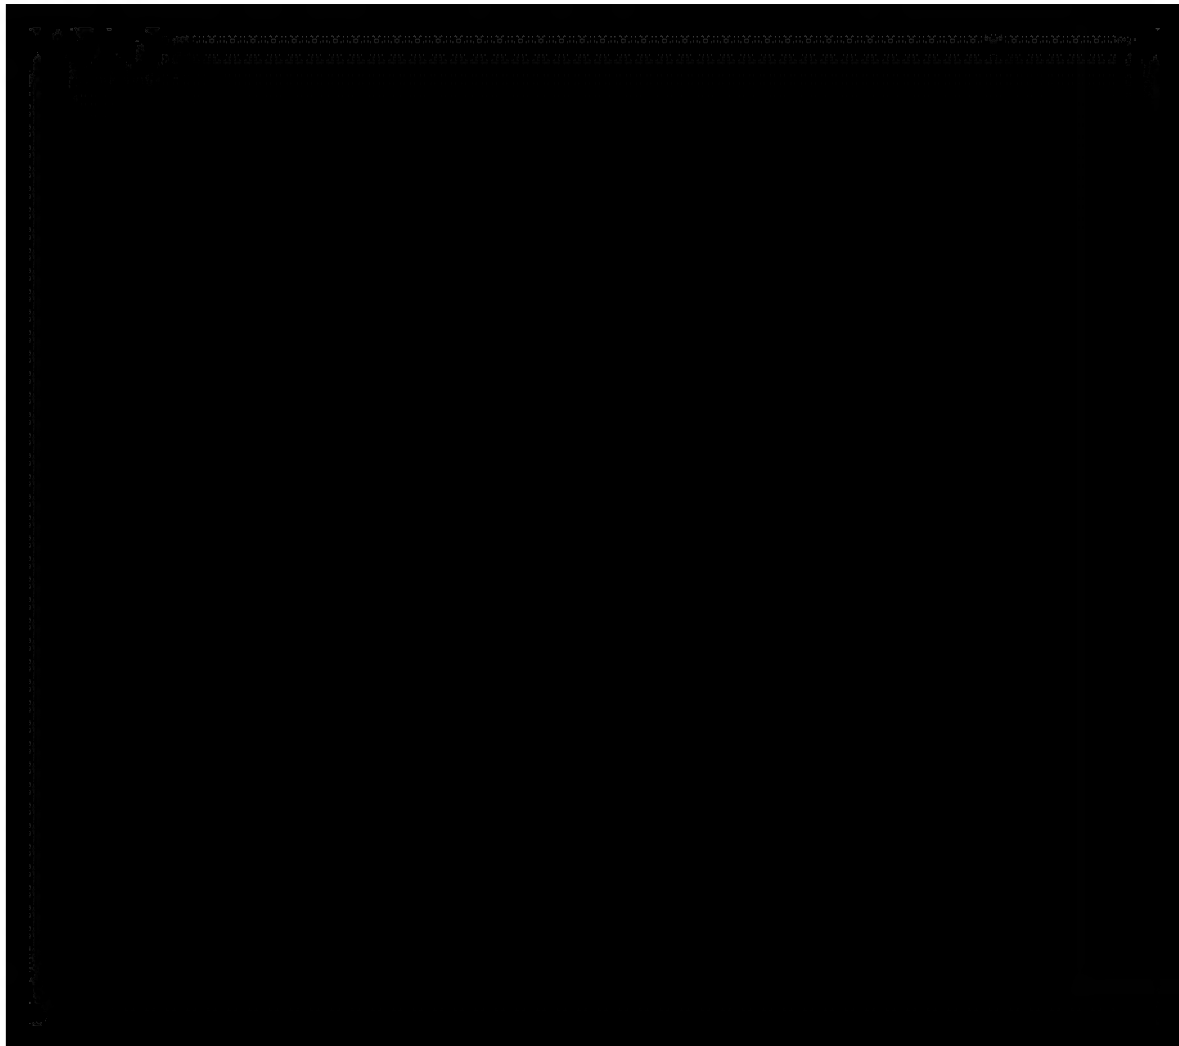

Plant No. 64 as of 8 November 1958. (USAIRA, Moscow, [REDACTED] 25X1A2g 15 Dec

58. S. USAIRA, USSR, [REDACTED] 25X1A2g S. USNA, Moscow, 263-8-58, 8 November  
1958, S.).

Comment: Voronezh Airframe Plant No. 64, former production site of the  
Badger (Tu-16) medium jet bomber, is believed to have started series  
production of the Cat about the first of 1958. In May 1958, one Cat  
was seen on the factory airfield and the following month, three were  
observed on the tarmac.
